METHOD FOR PERFORMING BROADCASTING SERVICE OF
SHORT MESSAGE IN COMMUNICATION SYSTEM

Representative drawing

(57) Abstract:

PURPOSE: A method for performing a broadcasting service of a short message in a communication system is provided to easily and conveniently talk with an information provider such as a service enterpriser for providing a desired broadcasting

message.

CONSTITUTION: A transmission request message of a broadcasting message having a name and a telephone number of an information provider from the information provider through a message center. The name and the telephone number of the information provider are included in the requested broadcasting message. The transmission request message of the broadcasting message processed in the message center is transmitted to all terminals through a base station. The broadcasting message having the name and the telephone number of the information provider is received through the terminal. A contents of the broadcasting message, the telephone number and the name are displayed on a display device of the terminal.
